Unidentified Exports - buses that have been sold, but have not been traced

Occasionally we know of buses that have been sold or exported by their previous known owner, but don't have any further details of where they have gone. This list shows those buses that we believe have been exported by their previous owners to other countries, making them difficult to list on individual 'Country' pages, and so we have created this list to record these until we can trace the buses in question. These 'exports' can be transfers within a sightseeing group for example, or disposals by other owner/operators to an as yet unidentified buyer. The buses listed here are those that we need to confirm the location and status of. These buses do not appear on any of our other lists, so if you're looking for a particular vehicle, it could be here.

Please have a look at this page and if you can update any of it, even if only a small piece of information that helps to determine where a bus is now, then please contact us using the link button on the Front Page.

The buses are divided into lists in Chassis manufacturer order.

Leyland Titan PD2

REG NO / LICENCE PLATE	CHASSIS	BODY	STATUS/LAST KNOWN OWNER
EDB 549	Leyland Titan PD2	Leyland	Exported to a unidentified country by Quantock Motor Services, Bishops Lydeard, England, 5/11
